

## What's in a Slice?

### Activity

#### Materials

- Knowledge Center [What's in a Slice?](#) Infographic
- Writing utensils (possibly colored pencils/markers/crayons)
- Printer paper
- Research device (optional)

#### Procedure

1. Have students ask their parent/guardian for their favorite recipe or have students research their favorite meal and an accompanying recipe (to make this activity work correctly, the recipe should include a minimum of five ingredients).
2. Have students write down the ingredients listed within the recipe. Students should then research each ingredient. Have students list the possible ingredient origins and a fact. They should then create their own "What's in a Slice?" Infographic.
  - ★ This can be done as individual or group work
  - ★ For an added activity, students can present their findings
